RE: Transports allowed to St. Luke's Community Hospital-Shawnee and South OP

Effective immediately, patients may be transported to St. Luke's Community Hospital at:

- Shawnee location (14950 W. 67th St, Shawnee)
- South Overland Park location (7651 W. 159th St., Overland Park)

Rationale:

Both facilities have notified us that they now have working Biocomms to allow for required two-way communication between our EMS crews and hospitals.

The other St. Luke's Community Hospital locations within Johnson County remain allowable transport destinations for **minor illness/injury and who are (in the provider's judgement) unlikely to require secondary transport to another hospital.**

As always, feel free to email or call with any questions/concerns.

Respectfully,
