RE: EMS PROTOCOL APP

There is now a free JOCO EMS System Protocol App that is available for download on both the Google Play store and Apple's App Store. Instructions on accessing app are as follows:

Search: **Johnson-county-ems** (you need to include the dashes or it will not show up)

The app has just been updated as of last night to include the new changes to protocol that took effect at 0800 this a.m. (8/1/2014). If you already have the app please update it now to have the latest version.

The app has a "send e-mail" function that will allow you to report an "Outdated Protocol", "Report a Bug", or "Ask a Question". If you use this function the app creator will get the email and determine if it is a technical issue on his end that needs fixed or if it is a clinical/protocol issue. If it is the latter, he forwards me the email so I can address the issue.

This is a new thing for JOCO EMS System and I am excited to have an app that is available for everyone and appreciate the work of Deputy Director Kevin Whittaker in working with the app developer to make this happen.

Respectfully,

A handwritten signature in black ink, appearing to be "Ryan C. Jacobsen".

Ryan C. Jacobsen MD, EMT-P
JOCO EMS System Medical Director
